

## PPMU GRAPE SHELTER #02

**Project Year** : 2022  
**Location** : Blitar, Indonesia  
**Project Type** : Built Project  
**Project Team** : Fikri Izza  
Nurbaiti Khasanah  
Satrio Seno  
Tedy Shahidan

**Short Desc.** : Located in a rural area of Blitar, this project aimed to be an educational grape garden display area and a motorbike park for santri. This project is a part of an educational activation series initiated by a grape community known as Kung Anggur along with City's oldest islamic boarding school named Pondok Pesantren Maftahul Uluum.

During the design process, our focus relies on the circulation of motorbikes and the growth of the grape itself. We tried to reduce the column usage inside the shelter.
